Since its establishment in 2007, Indonesian Danone Institute Foundation (DII) has contributed to the development of science and research in the field of nutritional health. The blue print of the activity has led the Foundation growing to be one of the 18 Danone Institute around the world and proof its continuous commitment in promoting public health, especially in the field of nutrition.

The following are the summary of its accomplishment in the period of 6 productive years: provide funding for 35 research studies, published 50 kinds of publications, including 18 articles in international journals, disseminating research results in 42 seminars, generate up to 43 articles about balanced nutrition media, 54 research reports, and variety of books and educational materials on nutrition.

This book is intended to documents all activities, achievements and the dynamics of the Foundation in the last years and expected to be digested by similar institutions, researchers, academics and to the general public.

Finally, the book is expected to be a historical record that show the color and contribution of the Foundation to the betterment of the future generation.
